CITRUS FRUITS, NON-CITRUS FRUITS, NUTS, AND POTATOES FINAL ESTIMATES

USDA's National Agricultural Statistics Service has published final estimates for Citrus Fruits, Non-citrus Fruits, Nuts, and Potatoes, including revisions made by the Agricultural Statistics Board (ASB), for the production years 2013 through 2017. Acreage, yield, production, price, and value data were published during calendar years 2013-2017 in periodic ASB reports. Data included in this publication provide a historic record and a benchmark for current estimates.

Revisions were made after a thorough review of the original survey data and all additional data now available, including the 2017 Census of Agriculture. Other data series considered included marketing agreement records, recorded truck and rail movement, quantities inspected, quantities used by processors, and the latest available inventory surveys. The current acreages were evaluated with historic totals to ensure comparability with past Census relationships. The 2013-2017 citrus fruits, non-citrus fruits, nuts, and potatoes estimates are considered final and are not subject to further revisions.

The estimates can be accessed using the QuickStats online database, found here: http://www.nass.usda.gov/Quick_Stats/
